

FULL STACK WEBDEV ROADMAP

Basics of HTML, CSS & JS
Choosing a framework
Version Control
Choose a language for backend
Head to Databases
Devops CI/CD

Complete 7 Months Guide

LEARN THE BASICS

(1 MONTH)

HTML

- Forms & Validations
- Conventions and Best Practices

CSS

- Making Layouts
- Floats, Position, Display, Grid, Flexbox, Box Model
- Responsive Design

JavaScript

- Syntax & Basic Construct
- DOM Manipulation
- Fetching APIs / AJAX
- ES6+ Syntax

SAVE & SWIPE

CHOOSE A FRAMEWORK (1.5 MONTH)

(Choose any 1)

CSS

- Bootstrap
- Tailwind
- Bulma, Foundation or any other.

**My Preference*

B

Sass

PREPROCESSOR

- SASS
- Less

JavaScript

- React
- Angular
- Vue

SAVE & SWIPE

VERSION CONTROL SYSTEM

(15 DAYS)

- Git
- Github / Gitlab / BitBucket

Package Managers

- NPM
- Yarn

Module Bundlers

- Webpack
- Rollup
- Parcel

***Note** - If you have chose ReactJs you should also learn

- NextJs
- Redux

SAVE & SWIPE 

FRONTEND DONUT

Wanna have a donut?

CSS

- Floats & positions
- Flexbox
- CSS Grid
- Display & transform
- Box Model
- Media Queries
- Responsive Design

VCS

- GIT
- GITHUB
- Gitlab
- Bit Bucke (any one)

JAVASCRIPT

FRAMEWORKS

- React Js
- Angular
- Vue Js (any one)
- Bootstrap
- Tailwind
- Bulma
- Semantic UI

CSS 3

CSS 3 PREPROCESSOR

- SASS
- LESS (any one)

HTML

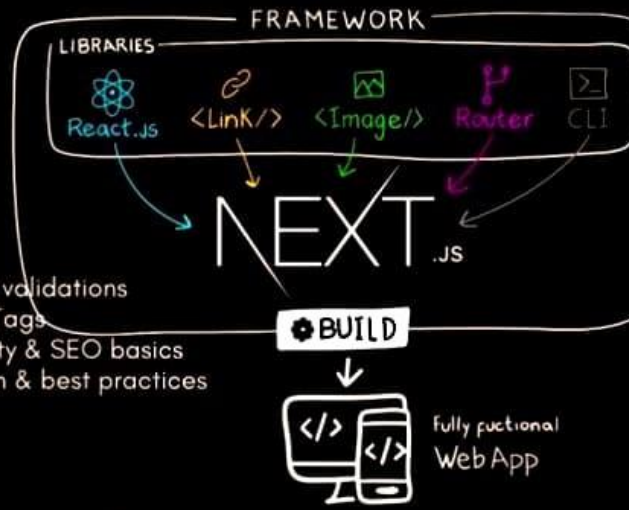

- Forms and validations
- Semantic Tags
- Accessibility & SEO basics
- Convention & best practices

DESIGN TOOLS

- Figma
- AdobeXD
- Photoshop
- Illustrator (any one)

JAVASCRIPT(ES6)

- Syntax & basic constructs
- DOM Manipulation
- Functions, Classes & Objects
- Fetch API or AJAX
- ES6 + Syntax
- Hoisting, Closures, Prototype
- Event Bubbling, shadow DO

Everything explained on @developers_community...

(3-4 MONTHS)
Frontend Finished

BACKEND STARTS

(1.5 MONTH)

Choose & Learn a language (Choose any 1)

- JavaScript
- Java
- C#
- PHP
- Python
- Ruby
- Go
- Rust
- NodeJs

Some Knowledge on OS & terminal commands

- Process Mangement
- Threads and Concurrency
- Basic Networking Concepts

SAVE & SWIPE

HEAD TO DATABASES

(1 MONTH)

Choose 1

DATABASES

Relational

- PostgreSQL
- MySQL
- MariaDB
- MS SQL
- Oracle

Non-Relational

- MongoDB
- CouchDB
- Cassandra
- InfluxDB
- Firebase

SAVE & SWIPE 

DEVOPS

(2 MONTHS)

Learn Some CI/CD Tools

- Gitlab CI
- Jenkins
- Azure Devops
- Circle CI

Cloud Providers

- AWS
- Google Clouds
- Azure , Linode
- Heroku, Digital Ocean

What is & how to setup _____

- Reverse & Forward proxy
- Load Balancer
- Caching Server
- Firewall

SAVE & SWIPE

BACKEND BURGER

Containerization

- Docker
- rkt (Prefer Docker)
- LXC

CI/CD Tools

- Jenkins
- Azure (any one)
- Circle CI

VCS

- GIT
- GITHUB (any one)
- Gitlab
- Bit Bucket

Frameworks

- Django
 - ExpressJS
 - Laravel
 - Ruby on Rails (any one)
- Depending on language you picked

Choose a programming language

- JAVA
- PYTHON
- RUBY
- PHP
- C#
- NODE JS
- GO
- RUST

Want this burger?

Architectural patterns

- Microservices
- Monolithic
- Serverless
- CQRS
- SOA

APIs

- REST
- JSON
- SOAP
- GSON

Caching

- CDN
- Server Side
- Client-Side
- Redis

Testing

- Integration Testing
- Unit Testing
- Functional Testing

DATABASE

- RELATIONAL
 - NON RELATIONAL
- PostgreSQL
 - MySQL
 - MS SQL
 - Oracle
 - MariaDB (any one in both)
 - MongoDB
 - RethinkDB
 - DynamoDB
 - CouchDB
 - GraphQL
