Callbacks vs Promises

Understanding the difference

Muhammad Fahad Memon
@muhammadfahadmemon

Callbacks

Traditional approach, can lead to callback hell if not handled properly.

Muhammad Fahad Memon
@muhammadfahadmemon

Promises

Provide a cleaner way to handle asynchronous operations, easier error handling.

Muhammad Fahad Memon
@muhammadfahadmemon

Chaining

Promises allow chaining multiple asynchronous operations for better readability.

@muhammadfahadmemon

Async/Await

Syntactic sugar on top of Promises, simplifies writing asynchronous code even further.

Muhammad Fahad Memon
@muhammadfahadmemon

In Summary

Callbacks can be messy, whereas Promises offer cleaner asynchronous code with chaining and async/await.
